

Phillip Cantu

Full-Stack Software Engineer

Glendale, AZ | 480-524-2209 | thereisphil@gmail.com | [linkedin.com/in/phillipcantu](https://www.linkedin.com/in/phillipcantu) | phillipcantu.com

PROFESSIONAL SUMMARY

Full-stack software engineer experienced in building production web applications with TypeScript, React, Node.js, and PostgreSQL. Background includes developing accessible (A11Y-compliant) user interfaces, architecting secure REST APIs, and clean relational schemas. Integrates modern AI-enabled engineering workflows to accelerate delivery while maintaining high test coverage and code reliability.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, SQL (PostgreSQL, MySQL, ClickHouse, SQLite)
- **Frontend:** React, Next.js, React Native, Tailwind CSS, HTML, CSS, Web Accessibility (A11y)
- **Backend & APIs:** Node.js, Express.js, FastAPI, RESTful APIs, GraphQL, WebSockets, Server-Sent Events (SSE), Supabase, ORMs (Prisma, Drizzle)
- **DevOps & Tooling:** Git/GitHub, GitHub Actions (CI/CD), Docker, Linux/Bash, Supabase, Jest, Vitest, Integration Testing

EXPERIENCE

Software Engineer Apprentice → Junior Software Engineer [\[link\]](#) June 2026 - September 2026
Hgraph- REMOTE

- **Shipped 143+ pull requests** across 16 microservices and packages in under 3 months, earning promotion from apprentice to junior engineer by owning multi-service features end to end.
- **Built and deployed production AI agent** ([hgraph.ai](#)) as a full-stack streaming service, integrating an SSE chat backend, Postgres RLS thread storage, org-scoped spend ceilings, and server-side credential isolation.
- **Optimized customer API usage dashboard** across ClickHouse SQL, GraphQL, and React, implementing bloom-filter skip indexes and bounded joins to eliminate full-table disk scans and improve query speeds.
- **Delivered enterprise SAML SSO** across the GraphQL and RLS layers, included JIT provisioning and admin endpoints with zero security regressions across 67 integration tests.

Software Engineering Apprentice [\[link\]](#) April 2026 - June 2026
Flatiron School- REMOTE

- **Selected for competitive paid engineering apprenticeship**, launching production features alongside a senior industry mentor with all code shipped through peer review and CI/CD pipelines.
- **Developed and launched interactive lesson-planner features** within a production Next.js application, translating product specifications into responsive, accessible UI components.
- **Co-engineered MatchPoint**, an AI job-matching platform using React, FastAPI, and Supabase Postgres; architected the Python backend, Google OAuth flow, and relational database migrations across 10 merged PRs.
- **Recruited directly by Hgraph** two months into the program to join their core engineering team.

EDUCATION

Master of Science in Computer Science (M.S.) Starting January 2027 - February 2028
Full Sail University, Winter Park, FL

Bachelor of Science in Web Development (B.S.) December 2026
Full Sail University, Winter Park, FL

AI & Data Science April 2027
Flatiron School, Wilmington, DE

Full Stack Development with AI [\[link\]](#) November 2025
4Geeks Academy, REMOTE

PROJECT LIST

MatchPoint [\[link\]](#) April 2026 - June 2026

- **Built a semantic job-matching engine** using OpenAI text embeddings and vector similarity scoring to automatically rank candidate resumes against incoming job specs, providing accurate relevance scores in real time.
- **Created the core FastAPI/Python backend service**, implementing asynchronous endpoints, Google OAuth session flows, and Supabase PostgreSQL schemas with automated migrations across 10 merged pull requests.
- **Developed responsive applicant dashboards in React and TypeScript**, added client-side state management, WCAG/A11y compliance, and keyboard navigation to handle candidate scoring views seamlessly across desktop and mobile devices.
